RANDOM PATTERN

Notes

Setting of joint-filling sand: Cover the vibrating plate with a removable rubber tread (neoprene or polypropylene).

Cover the snow removal tools with Teflon or neoprene protectors to minimize the risk of damage from scratches or concrete shards.

Laying patterns: These laying patterns are by way of example only and represent only a few of many possibilities. Permacon shall not be responsible for the excess or shortage of pavers resulting from installation according to these laying patterns.

Additional details specific to this product are available by consulting our landscaping installation guide on our website (Pavers section and Permeable pavement section).

Specific Installation

INSTALLATION OF AN IRREGULAR PATIO OR SIDEWALK—WITHOUT CUTTING

STEP 1
Place 3 pavers together in order to form a cloverleaf.

STEP 2
Add more sets in multiples of 3 pavers (cloverleaf) to fill in the surface to be covered.

STEP 3
Complete the balance of the surface to be covered with a single paver for the final result.

STRAIGHT BORDERS

In order to achieve a straight border for a patio and/or sidewalk, you must install the pavers in such a way that it surpasses the surface completely. Saw cut the excess pieces. Tighten the pavers together using a few rows of Mega-Trafalgar or Vendome pavers sealing them with Plastic Edge.
