

TECHNICAL DATA SHEET - OVERVIEW

URBANO WALL

Dimensions (mm)

(Height x Thickness x length)

120 x 201 x variable (335, 402 & 469)

Approximate weight

40 kg / sq. ft

Colours:

Scandina Grey, Amber Beige, Shaded Grey

Finish:

Smooth

Physical properties

Compressive strength of the veneer modules (min):

30 MPa

Dry density (min):

2250 kg/m³

Water Absorption (max):

5%

Manufacturing standard

ASTM C 1372 Standard Specification for Segmental Retaining Wall Units

Size tolerances – Veneers units

Height : ± 2 mm

Length & Thickness: ± 2 mm

Technical support

Technical support provided by Permacon's representatives and engineering department. Product samples available upon request to your sales rep. Conformity certificate available upon request. This certificate is issued after testing done by our laboratory engineers and technicians.

To learn more about this product, you can consult our technical guide on our website: <https://permacon.ca/en> under the support to *professional*, *document* & *supports* tabs.

For information regarding the LEED certification program, please contact your representative or Permacon's engineering department.
